* At the time this final provincial report went to press, Presidential Decree No. 418 was issued (March 20, 1974) reconstituting the Bureau of the Census and Statistics into a new office under the administrative supervision of the National Economic and Development Authority.

PREFACE

Presented in this report are statistics of the population in the province as a whole, in urban and rural areas, and in municipalities and barrios, based on the data collected during the Population and Housing Census conducted on May 6, 1970. This report provides information on the number of inhabitants and their age, sex, marital status and other demographic characteristics as well as data on literacy, school attendance, migration, fertility, labor force and other social and economic information about the population.

While basic demographic information was collected for every individual in the population, sampling was utilized in the collection of household information on literacy, migration, fertility, economic activity, etc. The specific items which were covered in the sampling scheme adopted for the census are enumerated in detail in the Explanatory Text of this report.

This report is one of 67 in the series of the Final Provincial Reports on Population and Housing. The National Summary for the Philippines will follow after all the provincial reports in the present series shall have been published.

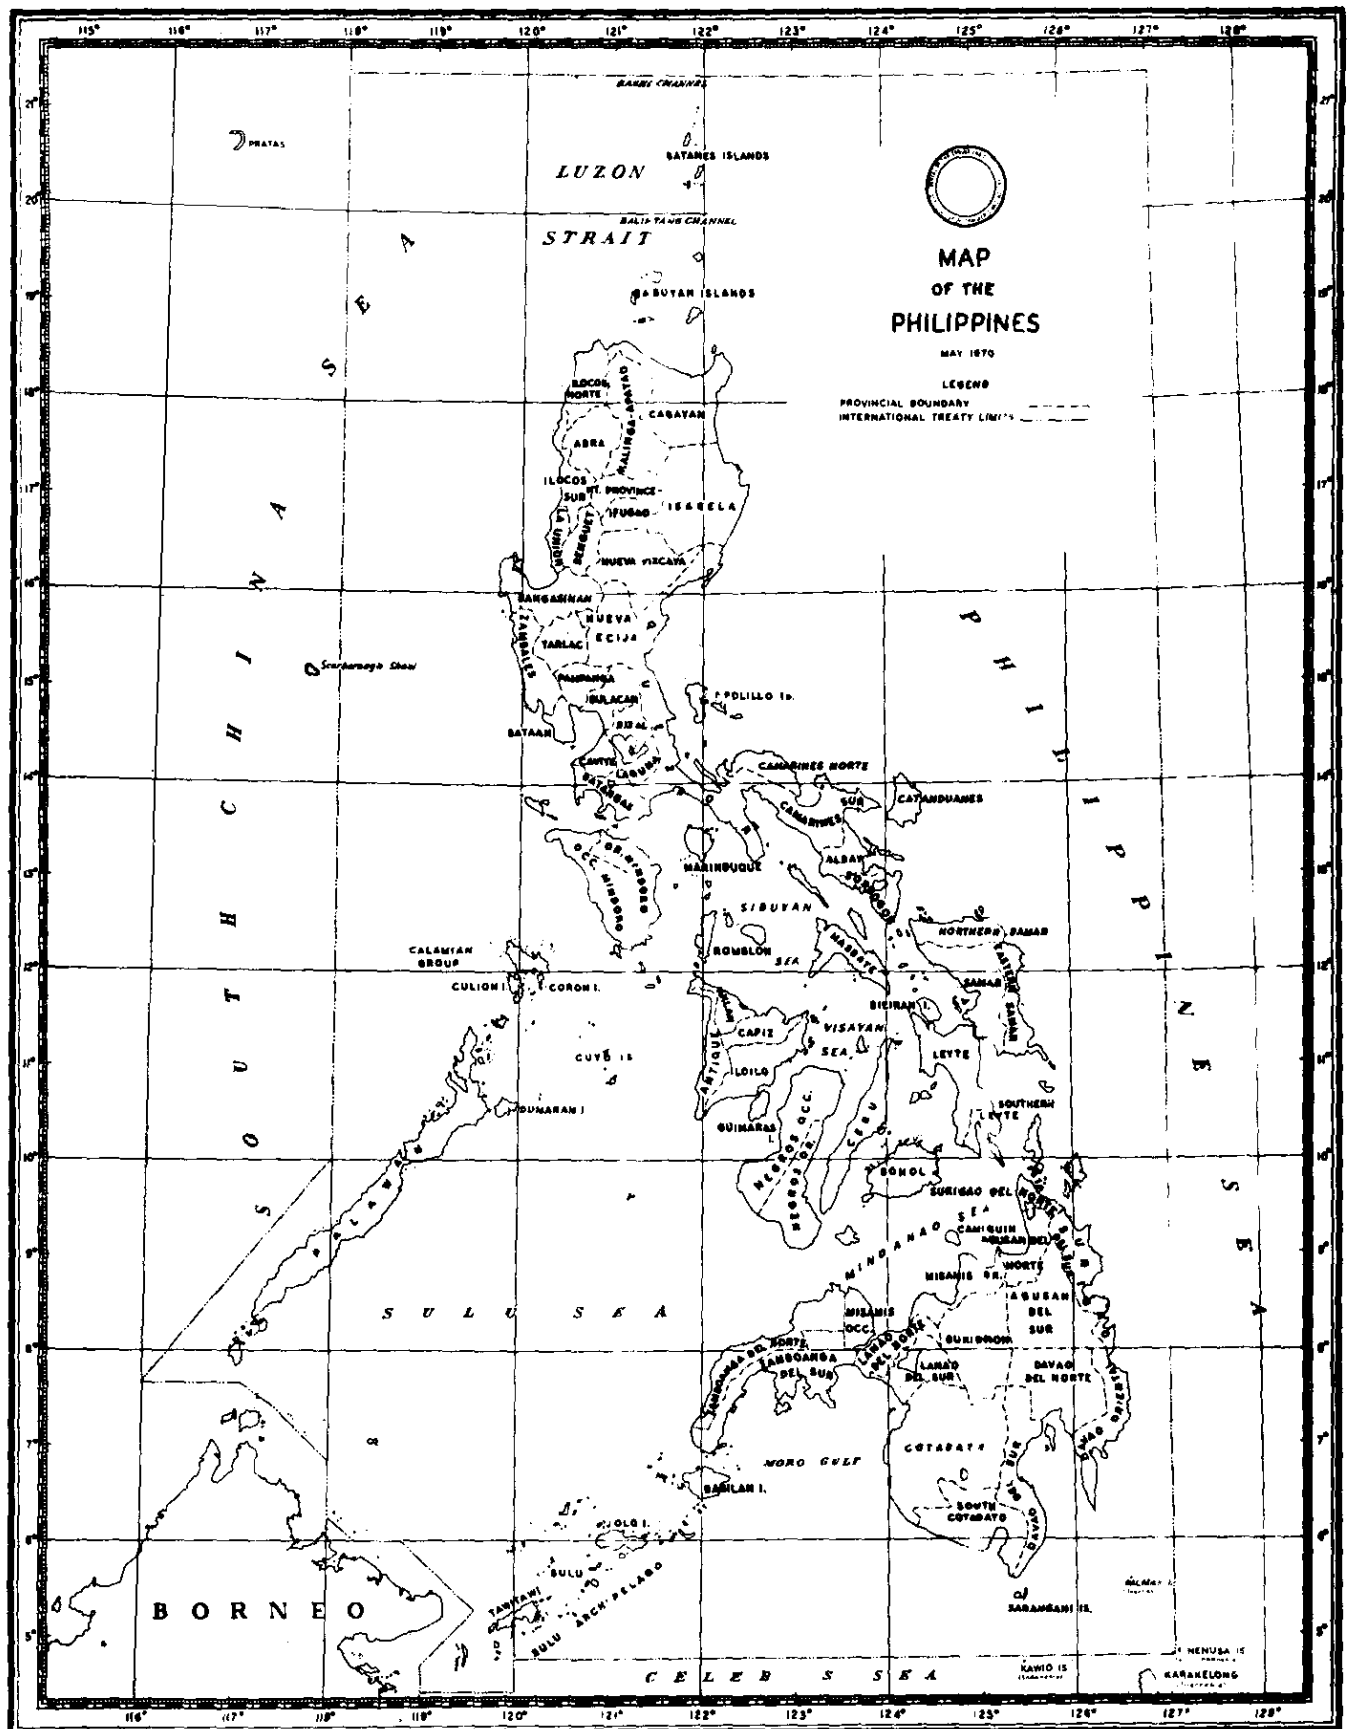

Other reports to be published are the Special Reports on: a) Population, such as data on employment status cross-classified with highest grade completed, school attendance, usual occupation or activity during the twelve months preceding May 6, 1970; the employed and unemployed by major industrial classification and major occupational classification; type of vocational or technical skill of the population 10 years of age and over; and mother tongue by literacy and highest grade completed of the population six years of age and over, and b) Housing—such as data on number of households and persons in households by type of building cross-classified by sex, age, and marital status of heads of households; by type of building cross-classified by usual occupation, activity and sex of heads of households; and by type of building cross-classified by type of activity, industry and sex of heads of households.

We are deeply thankful to His Excellency, the President of the Philippines, for authorizing the taking of the census and underscoring the need for the assistance and cooperation of all government agencies and instrumentalities in the census effort through the creation of the Presidential Census Coordinating Board composed of heads of certain Government Agencies, such as: the Office of the Executive Secretary, the Departments of Commerce and Industry, National Defense, Education, Public Works and Communication, Agriculture and Natural Resources, Health, the Presidential Assistance on Community Development (PACD), and the Presidential Economic Staff (PES), and the various bureaus and offices under them, and the Provincial and City, Municipal and Municipal District Census Boards which were chairmanned by the provincial governors, city, municipal and municipal district mayors, respectively.

Special mention is made of the assistance and cooperation of the Bureau of Public Schools which supplied the census supervisors and enumerators for the actual census taking and the Armed Forces of the Philippines which made available their communication and transportation facilities for the transmission of census messages and the transport of census forms to and from the province after the field enumeration.

Finally, we give our sincere thanks to the mass media and to the general public for their cooperation in this undertaking.

Part I — POPULATION

INTRODUCTION

The 1970 Census of Population, taken on May 6, 1970, was the first to be conducted by the Bureau of the Census and Statistics after the establishment of its local offices in almost all the provinces of the country. These field offices, which are staffed by two to ten regular employees, directed, supervised and controlled the field enumeration.

The figures in this report are based on the data collected through the schedules used during the population census enumeration, namely:

- PH Census Form No. 2 (Ordinary Household) which was used in 19 out of every 20 households enumerated;
- PH Census Form No. 2-A (Sample Household) which was used in 1 out of every 20 households enumerated; and
- PH Census Form No. 5-B (Institutional Census Report) which was used for those living in an institution or collective living quarters, such as jail, training camp, convent, ship, dormitory, seminary, hospital, asylum, military camp, welfare institution, etc.

Most of the items in these schedules were pre-coded to relieve the enumerators of the tedious task of memorizing or of having to constantly refer to the Enumerator's Manual for the necessary codes, reduce processing costs and time, and make possible the release of advanced data within a relatively shorter period. The latest available electronic data processing machine was also utilized to process the census data and hasten the publication of the census reports.

The total population of the Philippines on Census Day, May 6, 1970, was 36,684,486. This figure includes the household population of 36,602,532 and the institutional population of 81,954.

AUTHORITY FOR THE 1970 CENSUS

Commonwealth Act 591 authorizes the Bureau of the Census and Statistics "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

Executive Order No. 149, issued by the President on October 1, 1969, originally set Sunday, February 16, 1970, as the Census Day or the date of the start of enumeration. This was later amended by Executive Order No. 211, dated February 14, 1970, resetting the Census Day to Wednesday, May 6, 1970.

ADVISORY COMMITTEE

To avail of the expert advice of organizations and individuals with technical competence and experience in specialized fields, an Advisory Committee was formed.

Represented in the Committee were the Population Institute; National Coordinating Center for the Study and Development of

Filipino Children and Youth; University of the Philippines; Philippine Statistical Center; National Economic Council; Presidential Economic Staff; Department of Labor; Regional Urban Planning Office; People's Homesite and Housing Corporation; Department of Health; Department of National Defense; National Science Development Board; Commission on National Integration; Presidential Arm on Community Development; Bureau of Private Schools; Bureau of Public Schools; Budget Commission; Philippine Statistical Association; Institute of Planning and the Asian Development Bank.

PERSONNEL

A total of 79 regular bureau personnel were recruited from the various divisions to compose the Task Force that trained the Census Officers and served as resource persons during the operation. This Task Force was trained by the Chief Trainers who were ranking personnel of the bureau involved in the planning and preparatory phases of the census work.

Every province had a provincial census officer or officer-in-charge who supervised the field operations, assisted by well-trained central office personnel. For the entire country, there were 2,297 public school principal teachers designated as supervisors, and 66,722 public school teachers who served as enumerators during the census enumeration. Coordinating the activities of all the field force was an Operations Unit with its staff from the Manila Office.

CENSUS BOARDS

The Presidential Census Coordinating Board (PCCB) which was created by Executive Order No. 211, was responsible for the systematic coordination of government agencies and instrumentalities involved in the census effort. The Census Director was named Executive Officer of the PCCB, with the Executive Secretary as Chairman and the Secretary of Commerce and Industry as Vice-chairman. Represented in the PCCB were the Departments of Commerce and Industry, National Defense, Education, Public Works and Communication, Agriculture and Natural Resources, Health, the Presidential Assistant on Community Development and the Presidential Economic Staff.

As counterpart of the PCCB at the local government level, there were also established Provincial, City and Municipal Census Boards which provided such assistance and facilities as were required during the field enumeration.

The Provincial Census Board was composed of the Provincial Governor as Chairman, and the Division Superintendent of Schools, Senior District Highways Engineer, PC Provincial Commander, Provincial Health Officer, Provincial PACD Official and the Provincial Agriculturist as members.

DEFINITION OF TERMS AND CONCEPTS

The following terms and concepts were used in the conduct of the census enumeration —

URBAN AND RURAL AREAS

The following concepts were followed in classifying areas as urban in the 1970 Population Census:

- I. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- II. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- III. Poblaciones or central districts (not included in I and II), regardless of the population size, which have the following:
 - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
 - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - (1) A town hall, church or chapel with religious services at least once a month;
 - (2) A public plaza, park or cemetery;
 - (3) A market place or building where trading activities are carried on at least once a week; and
 - (4) A public building like a school, hospital, puericulture and health center or library.
- IV. Barrios having at least 1,000 inhabitants which meet the conditions set forth in III above, and where the occupation of the inhabitants is predominantly non-farming/fishing.

All areas not covered in the definition of urban places are considered rural.

In the 1960 census the following areas were considered urban:

- I. In their entirety, all municipal jurisdictions which, whether designated as chartered cities, provincial capitals or not, have a population density of at least 1,000 persons per square kilometer. The whole of Quezon, Baguio and Cebu cities, notwithstanding the minimum density rule, are to be included.
- II. For all other cities and municipalities with a population density of at least 500 persons per square kilometer, only the poblacion (regardless of population size) is to be considered; a barrio having at least 2,500 inhabitants and any barrios contiguous to the poblacion with at least 1,000 inhabitants. For those where the poblacion is not specified, the central district or "city proper" (e.g., for Davao—Bucana (1) Davao Proper (2) Molave (3) shall be regarded as the poblacion.
- III. For other cities and municipalities with a population of at least 20,000 persons, only the poblacion (regardless of population size) and all barrios having at least 2,500 inhabitants and contiguous to the poblacion.
- IV. All other poblaciones having a population of at least 10,000 persons.

USUAL PLACE OF RESIDENCE

The usual place of residence is the geographic place (street, sitio, barrio, municipality or province) where the enumerated person usually resides. This may be the same as or different from his legal residence, or the place where he was at the time of the census. As a rule, it is the place where he lives and sleeps most of the time.

HOUSEHOLD

Usually a household consists of a group of people who sleep in the same dwelling unit and have common arrangement for the preparation and consumption of food. However, a person living alone in a distinct dwelling unit is considered as one separate household. In most cases, a household consists of a related family group. In some instances, three generations may be found living together in one household. Some household members may have no relationship to the central group—boarders and servants, for example—but they are counted as part of the household if they eat and sleep or at least sleep in the same dwelling unit.

A "lodger" (who rents a room or space) is grouped with the household from whom he rents his room or space unless he has separate cooking facilities and a different entrance.

In most cases, a household may be taken to be the entire group of persons who customarily sleep in one dwelling unit. An exception, however, is that of two or more distinct family groups with independent eating arrangements who share one dwelling unit only for economy or for lack of housing facilities in the district.

PERSONS NOT LIVING IN HOUSEHOLD

These include persons in military installations, correctional and penal institutions, dormitories of schools and universities, hospitals, religious institutions and the like.

HEAD OF HOUSEHOLD

The head of household is the person who generally provides the chief source of income for the household unit. He is the adult person, male or female, who is responsible for the organization and care of the household or who is regarded as such by the members of the household.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head. Examples of this relationship are: wife, son, daughter, son-in-law, daughter-in-law, grandchild, other relatives (niece, nephew, aunt, uncle, etc.), not related members (boarder, servant, etc.).

USUAL MEMBERS OF THE HOUSEHOLD

These are members of the household who regard the dwelling unit presently enumerated as their home or the place where they usually sleep.

EXPLANATORY TEXT

SPECIAL AREAS

This is a classification of the living arrangements for a group of ten or more persons unrelated to the head of the household or the person in charge.

PERSONS COUNTED AND ENUMERATED

These include the following:

- a. Those present and alive at the time of the enumeration except those born after 12:01 A.M. of May 6, 1970;
- b. Those temporarily absent at the time of the enumeration for various reasons which include those:
 1. on vacation;
 2. on business;
 3. schooling below college level;
 4. confined in a hospital, if confinement is not more than six months;
 5. in the Armed Forces, if their absence is not more than six months;
 6. in jail (provincial or municipal), if their sentence does not exceed six months.
- c. Those who are temporary residents or who are not certain they will be enumerated in their usual residence;
- d. Employees and domestics who live with the household, or at least sleep in the same unit;
- e. Filipino employees and domestics employed by a foreign family, who will not be enumerated in their usual place or residence;
- f. Boarders or lodgers who regularly sleep in the same dwelling unit;
- g. Citizens of foreign countries who are students or who are employed, or who have a business in the Philippines and who are not living within the compound of any embassy, ministry, or legation and who expect to reside in the Philippines for a year or more. These include members of their families if they are in this country with them and who are also expected to reside in the Philippines for more than a year; and
- h. All those who are alive on May 6, 1970 (12:01 A.M.) but who subsequently died prior to the date of enumeration.

FAMILY NUCLEUS

A family nucleus is restricted to a married couple or parents and their never-married children in the same household, that is, to the conjugal family nucleus. A conjugal family nucleus consists of any of the following:

- a. a married couple without children;
- b. a married couple with one or more never-married children;
- c. one parent (either father or mother) with one or more never-married children.

AGE

This is the age of the person on his last birthday as of Census Day, May 6, 1970, in completed years. When the age of a person is not reported in the form, it is estimated on the basis of other available information such as marital status, school attendance, employment status and age of other members of the family.

CITIZENSHIP

A person's citizenship depends on the country to which he owes legal allegiance. If the father is a foreigner and the mother is a Filipino, infants or minor children follow the citizenship of their father.

MARITAL STATUS

This refers to the following:

- a. **Single** — denotes a person who has never been married.
- b. **Married** — denotes a person legally married, either living together with spouse at the time of the census or temporarily separated owing to work, illness, or service in the Armed Forces or a person who lives with someone as man and wife, whether legally married or not.
- c. **Widowed** — denotes a married person whose spouse died and up to the census taking has not remarried.
- d. **Separated** — denotes a person permanently separated from the spouse, legally or otherwise, because of marital discord or some other reasons. "Separated" in this sense does not mean separated because of husband's military service duty, hospitalization, etc., which would separate the couple from each other temporarily.
- e. **Divorced** — denotes a person who is granted such status through a court decree.

AGE AT FIRST MARRIAGE

This refers to the age when a woman first entered marriage or her first consensual union (even if she were married more than once). Marriage here may either be a legal or consensual union (where the man and woman decide to live together without benefit of clergy or civil ceremony). Age refers to the particular age when a woman first had her marriage consummated. In a consensual union, the age at first marriage refers to the date when the couple started living together.

MOTHER TONGUE

REFERENCE WEEK

The data on the economic activities of persons 10 years old and over relate to the calendar week preceding the enumerator's visit, thus the reference week is not the same for all respondents because not all persons were enumerated during the same week. The majority of the population was enumerated during the 10-day period from May 6 to May 16, 1970.

ECONOMICALLY ACTIVE

The economically active household population includes all persons classified as employed or unemployed.

EMPLOYED

Employed persons comprise all population of households 10 years old and over who, during the preceding week of enumeration, were either

- a) working for pay or for profit or without pay in the family business, farm or enterprise, or
- b) not working but had a job or business from which they were absent.

UNEMPLOYED

Persons in the household 10 years old and over are classified as unemployed if they were not at work during the reference week but were wanting and looking for work or would have been looking for work except that:

- (a) they were temporarily ill, or
- (b) they believed no work was available.

NOT ECONOMICALLY ACTIVE

Persons living in households and considered not economically active are those 10 years old and over who are not classified as employed or unemployed. Persons not economically active are further classified in this report into the following categories: (1) housekeeper, (2) student, (3) others.

HOUSEKEEPER

A housekeeper is a person who does housekeeping chores in one's house such as cooking, cleaning the house, and laundering for family members of the household. This does not include work around the house as painting one's house, fencing the home lot, cutting the lawn, etc. Persons doing this type of work are reported under "Others."

STUDENT

A student is a person enrolled in a school or college and is not considered economically active during the week prior to his enumeration. A working student is classified as "economically active" rather than "student" even though he spends more time in school than in his work.

OTHERS

"Others" may include persons doing any of the following activities:

- a. Retired or do not want to work
- b. Unable to work (because of physical disability or ill-health)

OCCUPATION

Occupation refers to the kind of work done during the reference week by person employed or the last work done by the unemployed but experienced worker, irrespective of the class of worker or industry in which the person is classified. Persons looking for work for the first time do not have any occupation and are therefore classified under a separate category.

USUAL OCCUPATION

This refers to the specific job or occupation performed by the person in the establishment, office, farm, etc., as farmer, typist,

stenographer, lawyer, physician, etc. This is the work a person has undertaken for the last twelve months before the census taking. Occupation here includes such usual activities as house-keeping in one's own house or studying and such status as disabled and retired.

INDUSTRY

Industry refers to the activity of the establishment in which an economically active person worked during the reference week, in the case of an unemployed but previously employed, to the activity of the establishment where he worked last. Therefore persons looking for work for the first time do not have any industry and are separately classified.

Part II — HOUSING

INTRODUCTION

The **Census of Housing** was taken simultaneously with the **Census of Population** on May 6, 1970. The housing census is the principal means of collecting basic housing statistics aimed at providing comprehensive source of statistical information for development planning, for the formulation of housing policies and programmes, as frame for sample housing surveys and supplementary inquiries and for private researchers and commercial users.

The **Census of Housing** is also intended to get characteristics of structures in which people live, i.e., all "dwelling units" in the country. All structures, including those under construction (ready for occupancy on May 6, 1970) and other places of residence were given a building serial number. The housing items (H1 to H15) were filled in only for all buildings/dwelling units in which people resided on May 6, 1970, regardless of whether they were residential or non-residential.

HOUSING ITEMS

The housing items are the same for both PH Census Form No. 2 (Ordinary household) and PH Census Form No. 2-A (Sample household).

The items asked are the following:

Item No.	
1	A. Characteristics of building Type of building or house
2	Number of dwelling units in building or house occupied-unoccupied
3	Construction material of roof
4	Construction material of wall
5	Year building was built
6	B. Characteristics of dwelling unit Number of rooms
7	Number of households and persons occupying dwelling unit
8	Type of tenure
9	C. Household conveniences Ownership of radio
10	Ownership of television set
11	Ownership of refrigerator
12	Type of cooking fuel
13	Type of lighting
14	Source of drinking water
15	Type of toilet facilities

In accomplishing the housing schedule, Items 1 to 5 were asked of the first household to be enumerated in the building. Items 6 to 8 were asked of the respondent in any household the dwelling unit, and Items 9 to 15 were asked of each household respondent in the dwelling unit.

EXPLANATORY TEXT

DEFINITION OF TERMS AND CONCEPTS

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls which extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another, having a common entrance and a common exit.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation, or one not intended for habitation but occupied as living quarters by a household at the time of the census. In most places in the country a dwelling unit is a house. It may be an apartment, a group of rooms or just one room, a barang-barong, boat or cave.

The types of buildings are:

1. Single house—a complete structure intended for a single family or household.
2. Duplex—a structure intended for two households, with complete living facilities for each. It is a single structure divided into two dwelling units by a wall extending from the floor to the ceiling.
3. Apartment or accesorio—a structure usually of several stories, made up of independent living quarters, with independent entrance from internal halls or courts. An accesorio is one or two-floor structure divided into several dwelling units, each dwelling unit having its own separate entrance from outside.
4. Barang-Barong—a shack or makeshift shelter, usually built with light materials.
5. Commercial—a building used for trade and commerce such as a store or an office building.
6. Industrial—a building used for processing or manufacturing, such as a factory plant.
7. Agricultural—any structure used for agriculture purposes, such as barn, warehouse, etc.
8. Institutional—a hospital, school, church, etc.
9. Others—any structure which does not fall into any of the above classification.

NUMBER OF DWELLING UNITS IN THE BUILDING

This includes all dwelling units that are "occupied" and those that are "unoccupied". In cases of residential compounds or other residences having one or more auxiliary buildings (in addition to the principal building) and which are used as living quarters by some members of the household, said auxiliary buildings

are treated as annexes of the principal building, and as such all the buildings in the compound are considered as one dwelling unit.

CONSTRUCTION MATERIAL OF ROOF

The kinds of materials used in the construction of the roof are:

1. Galvanized iron, including aluminum and fiberglass
2. Asbestos
3. Concrete, tile
4. Cogon
5. Nipa, anahaw, buri
6. Others (canvas, salvaged materials, billboards)

CONSTRUCTION MATERIAL OF WALL

The kinds of materials used in the construction of the wall are:

1. Concrete, including hollow blocks, adobe stone, bricks, etc.
2. Galvanized iron, including aluminum
3. Wood, including plywood
4. Bamboo, including sawali

If the roof and walls are constructed of two or more materials, the predominant material is reported.

YEAR BUILDING WAS BUILT

This refers to the period when the extent of construction permitted occupancy for living purposes and not when begun. The year reported is the particular year when occupancy started or when the building was ready for occupancy even if not occupied.

NUMBER OF ROOMS IN THE DWELLING UNIT

This pertains to the total number of rooms in a dwelling unit. This includes the bedroom, dining room, living room, kitchen and other separate spaces used or intended for dwelling purposes. Passageways, verandas, lobbies, bathrooms and toilets are not counted as rooms.

NUMBER OF OCCUPANTS

This pertains to the total number of occupants or persons whose usual place of residence is with this dwelling unit.

The dwelling unit may contain more than one household, in which case the number of occupants includes all the members of the different households whose usual place of residence is this dwelling unit.

EXPLANATORY TEXT

1. Owner occupied only. A dwelling unit is "owner occupied only" if the owner is one of the persons living in the unit even if he is temporarily absent.
2. Owned and a part rented out. A dwelling unit a part of which is occupied by the owner and a part rented by another, i.e., if there is a lodger.
3. Owned and part occupied free by others. A dwelling unit may be owned by one of those living in the unit even if he is temporarily absent. In addition, a part of that dwelling unit may be occupied free by another household, family, relative, lodger, etc.
4. Rented only. A unit is "rented" if rent is paid or contracted for by the occupants, in cash or in kind.
5. Rented and part occupied free by others. "Rented and part occupied free by others" is when one household rents a dwelling unit and then allows another household to occupy a portion of the same unit without paying any rental.
6. Rented and part rented out. The term applies to the occupancy of dwelling unit that is being rented by one household, but a portion of which is being sub-leased, or rented out by said household to another household, lodger, etc.

1. Flush system/water-sealed—Water-sealed toilet is a type where after water is flushed or poured into the bowl a small amount is left in the bowl which seals its bottom from the pipe leading to the depository. In effect, flush toilet is one type of water-sealed toilet.

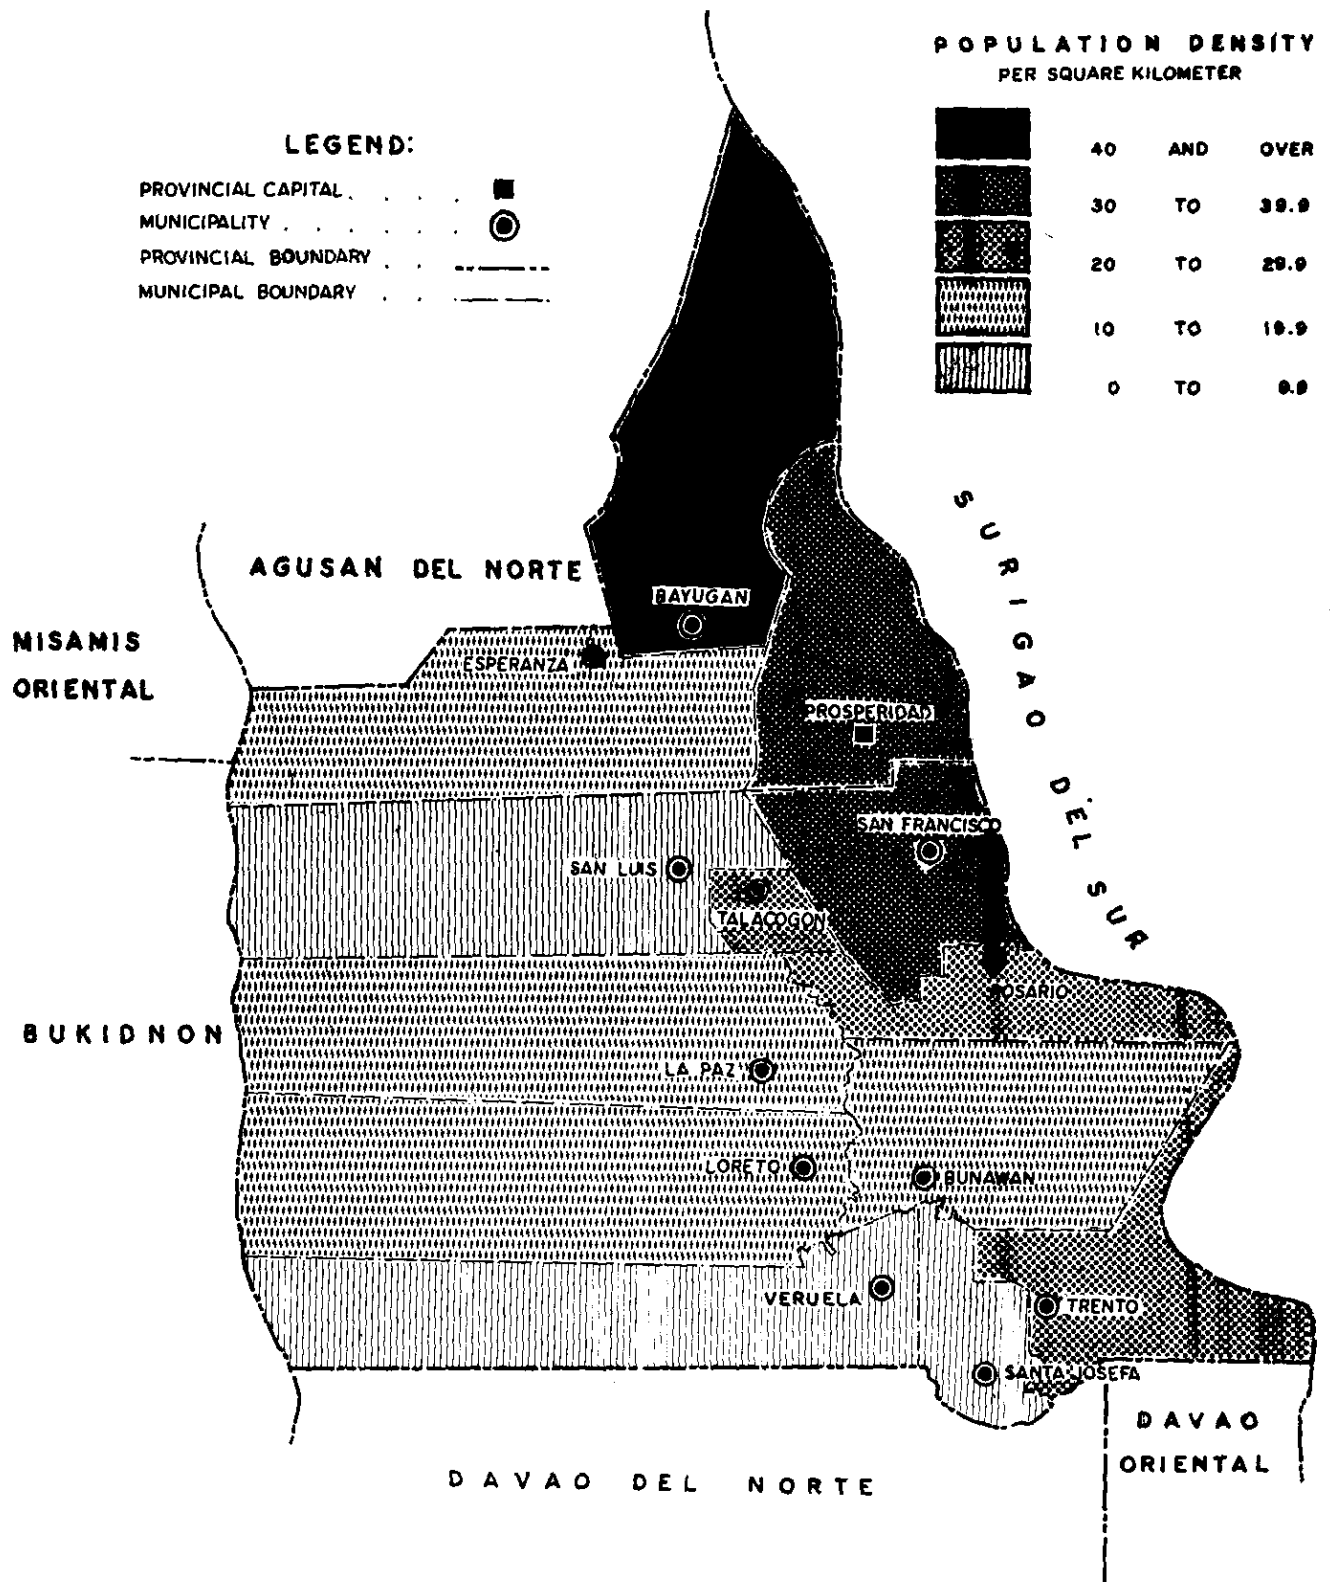

Another type of water-sealed toilet is the cement bowl with structure quite similar to an enamel bowl. It is connected to septic tank or concrete depository or sometimes drum or closed pit.

The other kind of cement bowl is constructed much lower than the above-mentioned type to conform to certain Filipino toilet habits.

2. Antipolo system or closed pit—is a type of toilet where water is not used. It is a closed pit or a drum with a small opening on floor level or with a box-like structure which is elevated from the floor.
3. Open pit system—is a pit which is entirely open or partially covered.

POPULATION DENSITY MAP OF THE PROVINCE OF AGUSAN DEL SUR BY MUNICIPALITY: 1970

AGUSAN DEL SUR

INTRODUCTION

The history of Agusan del Sur is closely linked with that of Agusan del Norte. Like its sister province, it was once a part of Surigao and later of Agusan, until it was created a separate province on June 17, 1967, by virtue of Republic Act No. 4979. The province lies in the east central portion of Mindanao and is bounded by the province of Agusan del Norte on the north, Davao del Norte on the south, the mountain ranges of Surigao del Sur on the east, and the Bukidnon plateaus on the west. Thirteen municipalities comprise Agusan del Sur, of which Prosperidad is the capital.

LAND AREA AND POPULATION

Considered the 7th biggest province in the country, Agusan del Sur occupies a land area of 8,965.5 square kilometers, representing 3.0 percent of the total land area of the Philippines. Almost all (99.9%) of its population of 174,682 are native born. (Table I-6). The females are outnumbered by the males. For every 100 females there are 106 males. The province has a density of 19.5 persons per square kilometer, or the 3rd least populous of the 67 provinces. In 1960 it had a density of 10.4, or an increase of only 9.1 persons per square kilometer over a ten-year period. In sharp contrast the entire country has a density of 122.3.

Agusan del Sur ranks 57th in population. While the population of the Philippines increased by 35.4 percent from 1960 to 1970 that of the province increased by 81,005, or 86.5 percent. During the same period, its population grew at a rate twice faster than that of the Philippines. The population of the country grew at an annual rate of 3.01 percent, whereas that of Agusan del Sur grew at the rate of 6.29 percent. It ranks 4th in the rate of population growth between 1960 and 1970.

URBAN-RURAL RESIDENCE

The province is predominantly rural; only 18.9 percent of the populace are urban residents while majority (71.1%) are rural residents. The males dominate the sex structure of the urban (50.8%) as well as the rural population (51.6%), while the females comprise 49.2 percent and 48.4 percent of the respective population (Table I-4).

HOUSEHOLDS AND CONJUGAL FAMILY NUCLEI

There are 29,357 households and 30,548 conjugal family nuclei in the province. An average of 5.9 persons composed each household and 5.7 persons, each family nucleus (Table I-3).

AGE COMPOSITION

Agusan del Sur has a higher proportion of the youth population than the country and correspondingly lower proportions of the working or productive ages and the older age group. Of the total population, 49.7 percent are 0-14 years of age; 49.0 percent, 15-64 years; and 1.3 percent, 65 and over. In comparison, 43.1 percent of the Philippine population are found in the age group 0-14; 53.4 percent, in the age group 15-64; and 3.5 percent, in the age group 65 and over (Table I-4). The median age of the population, which is 14.1 years, is 3.3 years lower than that for the whole Philippines.

The rural areas have a slightly younger population than the urban areas. Almost half (49.8%) of the rural population belong to the younger age group, while their urban counterparts constitute 49.1 percent. About 49.5 percent of the urban population are in the 15-64 age bracket and 1.4 percent, 65 and over. In the rural areas, the respective figures are 48.9 percent and 1.3 percent.

On account of its young population, the province has a high dependency ratio. There are 104 "dependents" for every 100 persons in the productive ages, as compared to 87 for the entire country. The dependency ratio in the urban areas is slightly lower, with 102, than in the rural areas, with 105.

Out of 115,567 persons aged 10 and over, 65,459, or 56.6 percent, fall under the former category and 50,037, or 43.3 percent, under the latter. Of those considered economically active, a great majority (95.2%) are employed. The unemployed make up only 4.8 percent. Of the unemployed, 55.5 percent are seeking work for the first time. Housekeepers constitute 56.0 percent of those not economically active; students, 15.6 percent; and "others", 28.4 percent (Table II-1).

married women who have reached the end of their child-bearing period (50 years and over). The average number slightly varies between ever-married women in the urban (5.6) and in the rural areas (5.5). The proportion of ever-married women who have had no children by the end of their reproductive period is 7.0 percent for the province. Comparatively, ever-married women in the urban areas are more fertile than their rural counterparts. Only 3.7 percent of the urban ever-married women fall under this category, as compared to 8.1 percent of the rural ever-married women. An average of 4.2 children are born to an ever-married woman who has already borne at least one child. The average number is slightly lower in the urban (4.0%) than in the rural areas (4.3%) (Table IV-1).

Early marriages are commonly practiced among the women in Agusan del Sur. Out of 35,054 ever-married women, 66.1 percent were married by the age of 20 and 91.4 percent, by the age of 25 (Table IV-7).

About 3.1 percent are built with roof of materials classified as "others" (Table 2).

Dwelling units constructed with roof of strong materials comprise 27.8 percent in the urban and 15.5 percent in the rural areas. Correspondingly, the proportion of structures with roof of light materials is higher in the rural (80.9%) than in the urban areas (71.4%).

By type of construction materials of the wall, a larger proportion of the dwelling units are found in structures with walls of strong materials (64.7%), and slightly more than one-third (34.1%), with

AGE-SEX COMPOSITION OF THE URBAN AND RURAL POPULATION OF THE PROVINCE OF AGUSAN DEL SUR: 1970

walls of light materials. The same pattern is observed in the urban as well as in the rural areas, although the proportion is higher in the former (78.0%) than in the latter (61.7%). Structures having walls of light materials comprise 36.8 percent in the rural areas and only 21.6 percent in the urban areas (Table 2).

TYPE OF TENURE

Majority of the dwelling units in Agusan del Sur are owner-occupied, owned and part rented out, and owned and part occupied free by others. While 91.7 percent belong to these categories, only 2.5 percent are rented, rented and part rented out, and rented and part occupied free, which is even lower than those occupied rent-free, with 5.8 percent (Table 3). A higher percentage of the rural dwelling units are in the owner-occupied categories (93.0%), with 1.0 percent rented only, and 5.9 percent, occupied rent-free. In comparison there is a bigger proportion of rented dwelling units (9.2%) and a lower proportion of owner-occupied ones (85.7%) in the urban than in the rural areas. However, the variation in the occupied rent-free category is very slight, comprising 5.1 percent in the urban areas.

A negligible number were built during the war (1942-1944) and before World War II, with merely 0.2 percent each for these periods (Table 4).

NUMBER OF HOUSEHOLDS IN EACH DWELLING UNIT

In most cases (95.6%), one dwelling unit contains only one household. One dwelling unit containing two households comprise 3.6 percent; three households, 0.5 percent; and four households, only 0.3 percent (Table 5). In both the urban (94.1%) and the rural areas (96.0%) a greater number of the dwelling units are each being occupied by only one household. Two households per dwelling unit constitute 5.0 percent in the urban and 3.3 percent in the rural areas.

NUMBER OF ROOMS

Slightly more than one-third, or 34.6 percent of the occupied dwelling units have one room, while 33.1 percent have 2 rooms and 21.4 percent, 3 rooms. About 7.2 percent have 4 rooms; 2.2 percent, 5 rooms; and less than one percent (0.8%), 6 rooms. Very few have 7 (0.4%) and 8 or more rooms (0.3%) (Table 7).

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR

Out of 29,357 households, 9,538, or 32.5 percent own radios. An insignificant number (0.1%) own television sets and only 0.5 percent, refrigerators (Table 9). The proportion of households equipped with these conveniences is higher in the urban than in the rural areas.

Of the 5,341 urban households 40.0 percent have radios, 0.2 percent have television sets, and 1.5 percent, refrigerators. Among the 24,016 rural households 30.8 percent are with radios, 0.1 percent own television sets, and 0.3 percent have refrigerators.

LIGHTING FACILITIES

A greater percentage of the households (91.5%) use kerosene for lighting, while 7.4 percent use electricity. Oil (0.6%) and "others" (0.5%) are hardly used at all (Table 11). Kerosene is widely used in the urban (89.0%) as well as in the rural areas (92.0%), with electricity being used by 10.7 percent of the urban and 6.7 percent of the rural households.

WATER SUPPLY

The open well is the main source of water supply for 32.1 percent of the total households, followed by spring, with 22.9 percent. The pump is used by 15.3 percent; rain water, 14.6 percent; lake, river, stream, etc., 11.2 percent, and the artesian well, 3.4 percent. A small number (0.5%) use piped water (Table 13). Among the urban households the pump (32.5%) and rain water (25.8%) are more common than either the open well (18.8%) or spring (10.3%). On the other hand, the open well (35.5%) and spring (25.7%) are more often used by their rural counterparts than rain water (12.2%) or the pump (11.5%). In the rural areas 12.3 percent use lake, river, or stream; 2.9 percent use the artesian well; and only 0.4 percent, piped water. While a smaller proportion of the urban than the rural households use lake, river, or stream (6.1%), a higher proportion use the artesian well (5.5%) and piped water (1.0%).

COOKING FUEL

Wood is the most common type of cooking fuel in the province, with 28,611 households, or 97.5 percent of the total number using it. A few use kerosene (1.7%) and gas or liquefied petroleum, (0.7%). Consumers of electricity constitute an insignificant 0.1 percent (Table 14).

In both the urban (95.0%) and the rural areas (98.0%) majority of the households use wood for cooking. Only 2.6 percent of the urban households use kerosene and 2.2 percent, gas, as compared to 1.4 percent and 0.3 percent of the rural households.

TOILET FACILITIES

By type of toilet facilities, 23.8 percent of the households have the antipolo or closed pit; 18.8 percent, the open pit; and 11.9 percent, the flush or water-sealed type. Very few (0.6%) use the public toilet facilities. Comparatively, better toilet facilities are observed among the urban households, with 28.6 percent using the flush or water-sealed type; 25.3 percent, the antipolo or closed pit; 21.5 percent, the open pit; and 1.0 percent, the public toilets. Of the rural households, 23.5 percent have the antipolo or closed pit; 18.2 percent, the open pit; and 8.1 percent, the flush or water-sealed type. Only 0.5 percent use the public toilets; however, almost half, or 49.7 percent lack toilet facilities, compared to 23.6 percent of the urban households.
